HUMAN–COMPUTER INTERACTION
A Journal of Theoretical, Empirical, and Methodological Issues of User Science and of System Design

Contents of Volume 13

Number 1

Promoting Active Learning: The Role of System Structure in Learning From Hypertext 1
Amy M. Shapiro

The Work of IT System Developers in Context: An Organizational Case Study 37
Gillian Symon

Cognitive Support: Extending Human Knowledge and Processing Capacities 73
Mark A. Neerincx and H. Paul de Greef

Number 2

Understanding Representation in Design 107
Susanne Bødker

Developing and Using Interaction Coding Systems for Studying Groupware Use 127
Timothy Nyerges, T. J. Moore, Robb Montejano, and Marcie Compton

MUST: A Method for Participatory Design 167
Finn Kensing, Jesper Simonsen, and Keld Bødker

Number 3

Introduction to This Special Issue on Experimental Comparisons of Usability Evaluation Methods 199
Gary M. Olson and Thomas P. Moran

Damaged Merchandise? A Review of Experiments That Compare Usability Evaluation Methods 203
Wayne D. Gray and Marilyn C. Salzman

Commentary on "Damaged Merchandise?" 263
John Karat, Robin Jeffries and James R. Miller, Arnold M. Lund, Ian McClelland, Bonnie E. John, Andrew F. Monk, Sharon L. Oviatt, John M. Carroll, Wendy E. Mackay, and William M. Newman; Gary M. Olson and Thomas P. Moran (Editors)

Repairing Damaged Merchandise: A Rejoinder 325
Wayne D. Gray and Marilyn C. Salzman

Number 4

Syndetic Modelling 337
David J. Duke, Philip J. Barnard, David A. Duce, and Jon May

On "Technomethodology": Foundational Relationships Between Ethnomethodology and System Design. 395
Paul Dourish and Graham Button

Concerns at Work: Designing Useful Procedures 433
John C. McCarthy, Peter C. Wright, Andrew F. Monk, and Leon A. Watts

Acknowledgment to Reviewers 459

Author Index for Volume 13, 1998 460
